

# VISI Flow Lite

Solutions that make sense!

## VISI Flow Lite - New Functionality!

When the bottom line matters, successful companies utilize the TST Competitive Advantage

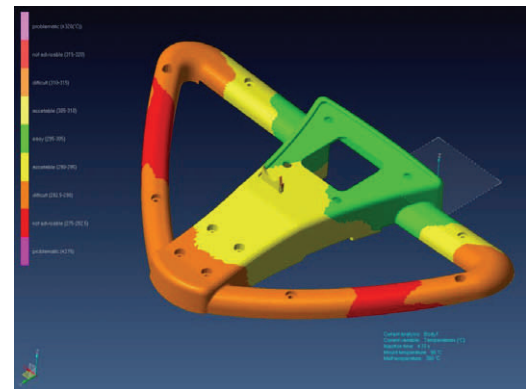

### Step-by-step Wizard:

- Easily run a filling simulation:
- Select the cavity
- Indicate the gates
- Choose the polymer grade

### Forecast and visualize:

- Isochrones
- Temperature
- Pressure
- Welding lines
- Air traps
- Molding machine size
- Shear stress

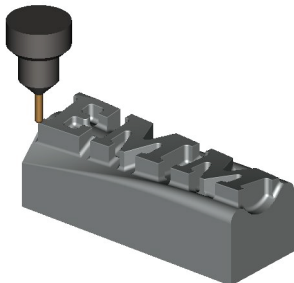

### Report Generation:

- Automatically and Manually
- Quality indicator with color rating for each variable
- Adapt projects to available molding machines
- List of possible remedies (coming soon)

### Ask about VISI Flow Pro for:

- Feeding and cooling channels handling
- Holding analysis (i.e. Sinks/Voids detection)
- Shape analysis (warpage)
- Thermal analysis
- Overmoulding, gas, co-injection, thermoset
- Capability to add & characterize new materials
